8' Barre with 2 double/adjustable brackets	

**Free standing/Portable**  
(Adjustable)

Completely independent adjustment design permits dancer on either side to set bar to preferred height (31" to 45") We feel this is the strongest, best braced and most easily adjustable portable ballet bar you can buy. Disassembles (without tools!) in about a minute and can be transported in even a small car. Choose from 5 barre lengths; one barre on each side. All wood barres are shipped in individual cardboard tubes and are hand-sanded without a liquid finish. Made in USA

4' Free-standing unit with barres on both sides	4' Free-standing unit with barre on one side
6' Free-standing unit with barres on both sides	6' Free-standing unit with barre on one side

10' Free-standing unit with barres on both sides	10' Free-standing unit with barre on one side
14' Free-standing unit with barre on both sides	14' Free-standing unit with barre on one side
16' Free-standing unit with barre on both sides	16' Free-standing unit with barre on one side

## Fir, Oak, and Maple Wood Ballet Bars (bars only)

Note: Wood bars are unfinished without stain or varnish. Made of natural wood.

FIR 1-7/8" dia. - OAK 1-3/4" dia - MAPLE 1-3/4" dia  
4', 6', 8', 10', 14' 16' Ballet bar only

## Chrome and Brass Ballet Bar Brackets

These Adjustable Ballet Barre steel Brackets are very sturdy and weigh 2 1/2 lb. each

(Double adjustable weigh 3 1/2 lb.)

They have a bright chrome finish. They come with #12 x 2" flat head screws.

Wall channel allows approximately 14" of adjustment.

Bar is not perfectly round. Wood: Douglas fir. [Wood info](#)

Fixed ballet bar brackets, aka, non-adjustable brackets are made of chrome or brass plated steel.

They have a bright chrome finish.

These Fixed Height Ballet Barre Brackets are very sturdy and weigh 1 lb. each. They come with #12 x 2" flat head screws.

4' Barre	2 brackets spaced 32" apart (8" overhang)
6' Barre	2 brackets spaced 48" apart (12" overhang)
8' Barre	2 brackets spaced 64" apart (16" overhang)
10' Barre	2 brackets spaced 80" apart (20" overhang)
14' Barre	3 brackets, 1 centered with 64" space on each side (20" overhang)
16' Barre:	3 brackets, 1 centered with 80" space on each side (16" overhang)

There is a 96" maximum span between brackets on 1 3/4" - 1 7/8" diameter Barres.

Minimum overhang is 2".

Maximum overhang is 20".
