GLASSLESS DANCE MIRRORS

A VIEW THAT'S CLEAR, LIGHT, AND SAFE

MAINTENANCE

Because the mirror surface is non-static, the frequency of cleaning is minimized. Glassless Mirror can be cleaned with a non-abrasive liquid household cleaner like Windex or Johnson's "Kleen n' Shine." A soft lint-free cotton cloth should be used to apply the cleaner. Should the

surface become lightly scratched, it can be restored by applying a carnauba wax, like Pledge, and polishing with a soft cloth.

As the mirror film has so little mass and the air space behind the film is ventilated through the core, Glassless Mirror is virtually free from condensation and fog in areas such as bath- rooms and swimming pools.

The air space behind the film allows it to flex under minor impact. While the film is extremely strong, a hard blow may dent the surface. Often this can be removed with a hot air blower. A sharp instrument could penetrate the surface. How- ever, the penetration will not run and the remainder of the surface will be undisturbed.
