CORK UNDERLAYMENT

CORK: A Natural Wonder

The unique natural qualities of cork underlayment make it a most effective material for the control of sound transmission in hard surface flooring applications. The physical structure of cork underlayment, with nearly 200 million completely sealed air filled cells per cubic inch, makes it a very effective acoustic insulating material.

Natural Cork Underlayment Rolls

**6 mm thick (0.24 inches)
4 ft.. Wide X 50 ft. long (200 sq. ft.)
